

Hottop Model Comparison

KN-8828B-2K

- Roasts beans by temperature
- Accurate K-Thermocouple
- Auto & Manual Control Roasting
- Temperature, time, fan speed, and heating element power can be modified during the roast
- Auto mode allows operation much like older models as well
- Numerous safety functions including manual emergency eject
- Capacity: 225g – 275g per roasting (250g optimal)

KN-8828B-2K+

- Roasts beans by time
- Dual K thermocouples monitor bean temperature and environmental temperature
- Auto and manual control roasting
- Temperature, time, fan speed, and heating element power can easily be modified during the roast
- Auto mode allows operation much like older models as well
- Numerous safety functions including manual emergency eject
- Capacity: 225g – 300g per roasting (250g optimal)

All Models

- Computer controlled roasting for accuracy and repeatability
- Fully automatic roasting & cooling
- User can end roast at any time
- Manual Emergency Eject mechanism
- External cooling tray with agitation arm and forced-air cooling fan (beans cool in 4-5 minutes)
- Deep chaff tray to make removal of chaff easy
- Very quiet operation. Easy to hear 1st and 2nd crack
- Built-in smoke reduction system
- Stainless steel cover and drum, steel internal frame
- Large window gives excellent view of the beans during roasting
- Audible and visual signals of roast progress
- DIMENSIONS
 - Steel Drum: 10 x 20.5 cm
 - Viewing Window: 10 cm
 - Height: 35.5 cm
 - Width: 25.5 cm
 - Depth: 48 cm
 - Weight: 8.6 kg
- Warranty: 1 year
